Summary

Software Engineer with 3+ years of experience building scalable backend systems, distributed services, and web applications using Node.js, Express.js, React.js, and modern development tools. Strong foundation in data structures, algorithms, object-oriented programming, multithreading concepts, and Linux-based development environments. Experienced in designing RESTful services, asynchronous processing workflows, real-time monitoring solutions, and modular system architectures. Familiar with C++, Java, Docker, CI/CD pipelines, and performance-focused backend engineering practices.

Technical Skills

Programming Languages: C++, Java, JavaScript, C

Backend Development: Spring Boot, Node.js, Express.js, FastAPI, REST APIs, Celery, Redis

Frontend Development: React.js, Next.js, HTML, CSS, Bootstrap

Databases: MongoDB, MySQL

DevOps & Infrastructure: Linux, Docker, Git, Jenkins, CI/CD pipelines

Computer Science Fundamentals: Data Structures & Algorithms, Object-Oriented Programming, Multithreading Concepts, Operating System Fundamentals, Networking Basics

Architecture & Methodologies: Agile (Scrum), SDLC, Modular System Design, ETL Concepts, Distributed Task Processing

Experiences

Software Developer — Platform & Analytics Systems

MGCS Thiruvananthapuram -> Sivani Associates (Client : CDAC Thiruvananthapuram) | June 2024 - Present | Jammu

Official Designation: Data Center OS FMS

- Developed backend and service-oriented components for closed-network enterprise platforms, focusing on reliability, modular architecture, and performance optimization.
- Built and maintained scalable backend services, asynchronous workflows, and inter-service communication layers to support efficient system operations.
- Designed and implemented RESTful APIs and backend processing pipelines, ensuring resilient data flow and maintainable service integration.
- Optimized MySQL and MongoDB data access patterns through indexing strategies, query optimization, and efficient schema design for high-volume operational data.
- Containerized backend services using Docker to enable isolated runtime environments, deployment consistency, and streamlined development workflows.

Full Stack Developer — Internal Applications and Feature Development

Scaler Academy | Nov 2023 - March 2024 | Bangalore

Official Designation: Business Development Associate

- Developed full-stack features using **JavaScript, Node.js, and React.js**, integrating **REST APIs** to enable internal workflows.
- Delivered features in Agile sprints, handling debugging, refactoring, and Git-based version control.

Software Development Trainee — Backend API Integration

Scaler Academy | Aug 2023 - Nov 2023 | Bangalore

Official Designation: Business Development Trainee

- Assisted in backend development using **Node.js and Express**, implementing API routes and validation logic.
- Contributed to Java backend modules, including SQL operations, API integrations, and minor service improvements.
- Gained exposure to backend architecture patterns, debugging, and unit testing within Agile development cycles.

Founder & Full Stack Developer — NEKOD Software Solutions Pvt. Ltd.

DPIIT Registered Startup – Startup India | Mar 2023 – Apr 2024

- Developed full-stack applications using Node.js, React.js, and REST APIs for internal tools and early-stage use cases.
- Designed database schemas and optimized queries using MongoDB and MySQL.
- Implemented API integrations and data processing workflows & Managed containerization using Docker.

Software Development Intern — Full Stack Project Delivery

JAKEGA, Dept of IT Govt of J&K | Dec 2022 - March 2023 | Jammu

Official Designation: Software Development Engineer Intern

- Built frontend using **HTML, CSS, and JavaScript** for a Soil Nutrient & Agriculture Information System.
- Implemented backend services in **Node.js**, integrating ML output APIs to generate actionable insights.
- Supported deployment, documentation, and project testing.

Projects

Ecommerce Web App (React.js, Bootstrap, React Router, Node.js, Express.js, MySQL)

- Developed a full-stack commerce platform with modular backend services supporting customer, seller, and transactional workflows.
- Designed and implemented RESTful APIs, backend business logic, and MySQL data models for scalable order and product management.
- Built responsive React.js interfaces integrated with backend services for dynamic data handling and efficient client-side navigation.

URL Shortener (Java, Node.js, MongoDB, HTML, CSS, JavaScript, Bootstrap)

- Developed a backend service to generate and manage short URLs with redirection capabilities.
- Designed a mobile-friendly frontend and implemented a Java-based backend with MongoDB for storage.
- Designed data persistence layer using MongoDB and optimized lookup performance for fast redirection.

Education

Guru Gobind Singh Indraprastha University – New Delhi, India

Bachelor of Technology (B.Tech), Computer Science – CGPA: 8.45/10 | 2018-2022

Additional Skills and Certifications

- Strong analytical and problem-solving skills for backend logic and application optimization.
- Effective communication and collaboration in **Agile teams**.
- Passionate about learning new technologies, improving code quality, and delivering maintainable solutions.

Professional Certificate

- **Oracle Cloud Infrastructure 2025 Certified Developer Professional** — Oracle [Verify](#)
Validated skills in building, deploying, and managing cloud-native applications using OCI services, microservices, containers, and serverless architecture.
- **Oracle Cloud Infrastructure 2024 Generative AI Certified Professional** — Oracle [Verify](#)
Demonstrated expertise in designing and integrating generative AI solutions within Oracle Cloud environments.
